

## **COVID-19 COMMUNITY SURVEY – JULY 2020 – Summary of feedback and actions**

**Survey 1:** At the end of Summer term Survey 1 was sent out to all families, which sought opinion and concerns surrounding a full return to school in September. Initial results of this were shared at the final FGB Meeting in July. Main concerns raised were:

- **Knowing what happens if we were to have a positive case** – Lots of information, posters and flow charts have been shared with all of our families about this each week from September.
- **Wanting regular updates on COVID cases at school** – This is a feature of weekly newsletters.
- **Knowing what safety routines would be in place** (handwashing, social distancing, face masks) – An updated Q&A was shared in Summer term and again in September as well as the Risk Assessment and details of safety routines.
- **Wanting children to have routine temperature checks at school** – This is not yet stated in guidance and is thought to be unreliable as normal daily practice in schools. We have a thermometer in school should we need to use this and this has been shared with families in the details given out.
